- 1. How would you describe your participation at the IGF meeting? (max. 150 words)**

IGF Berlin 2019 was my first time to participate to IGF and it gives me good opportunities. I am lecturer at university and I am working on cybersecurity project, by attending various panels I learned more about the topic and internet governance. It was also an opportunity for me to know and discuss with persons working on the same area of research. Finally I am thankful to the United Nation for the fellowship, the organizer and the host country (Germany) for the good job they have done to make IGF 2019 great.

- 2. What is the most important benefit you have gained at the meeting? (max. 300 words)**

The most important benefit is how IGF make an open space for dialogue on internet governance issues between all stakeholders, (government, parliamentary, private sector, civil society, education, media, end users, etc.) and promote a better understanding of internet governance among all stakeholder, to build the capacity of these stakeholders to

actively participate in national internet governance processes, to facilitate multi stakeholder discussions, exchanges and collaboration.

I am lecturer and actually working on cybersecurity project, I got so many ideas from this forum who can help me handle other aspects I have never seen before.

3. What inputs do you plan to bring to your community from the meeting? (max. 300 words)

I am planning to organize a meeting with my colleagues and students and discuss with them on some topics discussed at IGF to let them know where the word are about internet. I will be in touch with my national IGF to see how we can work together to make it grow.

4. Briefly outline your participation at the IGF meeting, including attended sessions, gained knowledge, networking, recommendations for improvements. (max. 500 words)

I was very happy to connect with stardoms from different parts of the world, we share contact and I hope we can work together on similar projects. I had opportunity to pay for my membership to IGFSa. I had opportunity to identify new project ideas and have them scrutinized by experts. I attended several session related to my project like:

- 1- Strengthening the multi-stakeholder approach on international norms in cyberspace
- 2- Africa - Between Ethical Challenges and Economic Development
- 3- Internet Commons Forum
- 4- Internet Governance and Digital Cooperation
- 5- African Union Open Forum
- 6- Addressing Violent Extremist Content Online: Rights, Responsibilities, Responses and Risks
- 7- Emerging technologies and their interfaces with inclusion, security and human rights (NRIs Perspectives)
- 8- BPF4 (Local Content)
- 9- CLOSING CEREMONY

Recommendations for improvements:

- Facilitate multistakeholder discussion and exchanges of ideas and opinions;
- Seek to foster multistakeholder collaboration among the stakeholders from their respective communities;
- Bring the perspectives of the respective communities to the global IGF agenda and reflect the perspectives of the global IGF into the NRIs events, where and when relevant and needed.
