IGF MAG meeting

Tuesday, 16 June 2020

Proposal for 2021

How to continue the work of the IGF intersessional work on internet and ICT standards and best practices?

Preparation in 2020

Proposal for 2021

What is the best option?

- Best Practice Forum?
 - Dynamic Coalition?
 - IGF Policy Track?
 - A new form to be decided on?
 - Policy incubator?
-
- What option guarantees fully inclusive representation best?

Fully inclusive and equal

- Technical community
- Consumer protection
- Civil society, including child protection
- Developing nations
- Policy makers
- Regulatory authorities
- Private sector decision takers
- Education representatives

by NATRIS Consult in cooperation with
Porte Consultancy

Setting the Standard

**for a more Secure and
Trustworthy Internet**

The identification of pressure points in society
to speed up internet standards deployment

Setting the standard

Reasons for slow deployment of internet and ICT standards and best practices:

- Absence of a business case
- Deployment is voluntary
- Absence of pressure on decision takers
- Collective action problem
- Insufficient knowledge (in education)
- Current actions are sub-optimal

Solutions

6 Recommendations

25 Pressure points in societies

To realise these, new forms of cooperation are necessary between other stakeholders

Proposal 2021

- Stimulation: Create a business case, e.g. through procurement policy for government and businesses
- Assist developing nations with procurement training
- Consider current legal and regulatory provisions, including testing of products, and media
- Change ICT education curricula
- Present the best current practices

Support for report outcomes

- Different organisations
 - ISOC sig IoT
 - Consumer advocates
 - Technical community
 - Governments
 - Privacy Authority
 - Civil rights online
 - Best practice organisations

Current impact

- EuroDIG had three sessions on standards
- Presentations (invites)
 - EC High level group on IG
 - EuroDIG
 - Netherlands Parliament
 - GFCE
 - Standardisation Forum
 - ISOC sig on IoT
 - NLIGF
 - UCEnet & Dutch regulators

Potential impacts

- Safer websites
- Safer software
- Secure IoT and ICT devices
- Safe ICT services and data storage
- Internet standards built in by design
- ICT best practices built in by design
- Higher level of privacy and security for all

Unique opportunity

How to continue?

A golden opportunity to tackle a complex, internet governance challenge and to keep the momentum to make the internet a safer and more secure place for all people, everywhere

We invite you to discuss this at this meeting

Thank you
